

CONVERTED VEHICLES

Go Further

One-Stop Shop direct from Ford

Our One-Stop Shop range of Transit conversions includes Dropsides, Tippers, Lutons and Box Vans. These all carry the full Ford 3-year/100,000 mile warranty.

Qualified Vehicle Modifier Programme

In addition to our One-Stop Shop range, we work with conversion specialists to ensure that more bespoke requirements can also be met by a model from our range. Our Qualified Vehicle Modifier Programme allows converters to become accredited if they can meet our high standards. From refrigerated vehicles and buses offering wheelchair accessibility to traffic management and utility conversions, we are confident we can meet your requirements.

Our QVM accredited converters match the base vehicle warranty on their vehicle conversions. For more information, speak to your chosen converter.

Chassis conversions

Factory-built Transit 'One-Stop' models, direct from Ford.

Ford Transit is renowned for its versatility and flexibility. Transit is the ideal platform for a wide range of specialist applications and bespoke conversions. What's more, for the convenience of those operators who want a quick and simple work-ready solution, Ford offers the Transit 'One-Stop' range of bodied Chassis Cabs. All factory-built 'One-Stop' models are manufactured to our exacting standards and comply with the latest European Community Whole Vehicle Type Approval (EWVTA) legislation.

VFS can provide a range of additional adaptations to your Ford Commercial Vehicle chassis such as standard fit optional extras. These can all be fitted during the build process of the vehicle or aftermarket, if needed and every conversion is supplied with EC Type Approval e.g. cages, tool pods, tool boxes, tow bars, beacon, tail lifts, decals and many more.

One-Stop 1-way and 3-way Tippers

Ford Transit Tippers represent superb functionality, with quality of design and manufacture. (Single Cab L2 shown)

One-Stop Dropside

Premium and Standard Dropside range offers load bed lengths from 2,850 mm – 5,223 mm. (Premium Dropside Single Cab L4 shown)

One-Stop Luton

Durable and robust Luton and Box Vans feature an easy-open rear shutter and translucent plastic roof. (L4 shown)

Chassis conversions

Standard or bespoke bodywork, from design to delivery.

Established for 35 years, Brit-Tipp Ltd have gained a reputation of supplying quality commercial vehicle bodywork solutions to a wide ranging customer base; Local Authorities across the UK, Public Utility, Environmental, Major Fleet Operators, Chassis Manufacturers and Retail End users. Brit-Tipp is unique in that the company successfully blends traditional bodybuilding skills with modern production technologies, such as CAD design and onsite laser fabrication. From a single bespoke conversion to a standardised production run, Brit-Tipp will meet your requirements. Exceed your expectations, contact us with your next enquiry. One-off or fleet build, all customers receive the same professional service and outstanding product quality. Brit-Tipp Ltd, proud to be a Ford Qualified Vehicle Modifier.

Demonstrations – part of our service

Brit-Tipp offers all Ford Transit customers excellent customer support and have regional sales managers to provide onsite operator guidance demonstrations.

Graphene infused paint

Brit-Tipp are the only UK bodybuilder able to offer paint infused with miracle material Graphene, considered the strongest substance known to science.

There's more to Brit-Tipp than just tippers

Caged bodywork, Dropside, Flatbed, Luton and Curtainsider, Beavertail, Traffic Management, Tail lifts and Cranes. All Brit-Tipp Ford Transit body types are built to our own in-house designs and are fully EC Whole Vehicle Type Approved.

Chassis conversions

Commercial vehicle bodybuilders, tail lift, ancillary and body aftercare specialists.

The JC Payne Luton is manufactured with a uniquely-designed aerodynamic pod and collars for smooth airflow, great aesthetics and enhanced payload. While the standard Luton has a 4.2 m loading length, JC Payne can build bodies in varying heights and lengths, and offer weight-saving options to suit your requirements.

Dropside

Dropside bodies are constructed to ensure maximum load capacity and durability.

Curtainside

Our Curtainsiders can be built in varying sizes and can also include the JCP Luton Pod for load capacity.

Special products

Our flexible approach means we can work with customers to design and build a body that meets their needs.

FWD Transit Skeletal Chassis Cab

With its lower chassis height providing a low-height platform the Transit Skeletal Chassis Cab conversion allows easier access to the load floor. Proves versatile for a variety of body conversions, ranging from delivery and distribution to removals.

Chassis conversions

Manufacturers of Commercial Vehicle Bodies since 1987.

PPS has built a strong reputation for manufacturing well-engineered, durable and reliable products for more than 30 years. We work closely with our customers to ensure each body is designed and manufactured to meet their specific individual needs. Our comprehensive product range includes: Dropsides, Lutons, Box bodies, Curtainside bodies, Flatbeds and Specialist Traffic Management bodies.

Lightweight body

The majority of our Dropsides are manufactured using aluminium, this ensures a more lightweight body and an increased payload capacity.

Volume manufacturer

We manufacture Luton bodies in volume and understand that operators are eager to get the maximum load capacity and payload possible from their vehicles.

Designed for your needs

Our 'PPS Luton Front' has been developed to reduce wind resistance, making the body more streamlined and cost-effective without reducing the payload. Conversions are available with a range of options, including tail lifts, tow bars and the PPS 'Safe Load' bulkhead that offers safe and secure 'over the cab' loading for Dropsides.

Chassis conversions

Engineered to meet your needs.

For customers across the UK, our experienced workforce and modern, fast-growing facilities deliver a proven range of reliable, high-quality conversions and fittings for Ford's exciting range of Light Commercial Vehicles. From a single vehicle adaptation to major fleet conversions, our extensive experience covers a wide range of industries and applications.

Specialist conversions

Mackworth conversions include more unusual projects, such as 4x4 vehicles.

Vehicle safety

We offer a wide range of safety and security products to help protect people and equipment.

Racking systems

Our vehicle racking and storage solutions are individually designed and installed to meet your specific transportation needs.

Full range of conversions

Our full range of conversions includes Tipper, Dropside and Box bodies.

Chassis conversions

Maximising vehicle potential.

The TGS range of Tippa, Dropsida, Utilitruk and Trafictruk bodies have an enviable reputation that can be traced back over 40 years. The lightweight, yet robust design has been key to our enduring success and has been proven by many fleet operators and Light Commercial Vehicle users nationally. Our bodies are constructed from corrosion-resistant materials and are modular in design, which enables us to add items including cage kits, sign gantries and tail lifts with relative ease.

Tippa with Meshmaster Cage

Lightweight aluminium tipping body with Meshmaster Cage kit and 500 kg tail lift.

Utilitruk Tippa

Lightweight aluminium tipping body with tool pod between cab and body.

Dropsida with Tail Lift

Lightweight aluminium dropsida body with 500 kg tail lift and Meshmaster Cage kit.

Chassis conversions

Engineered to meet your needs.

Founded in 1999, Bespoke Bodies designs, builds and manufactures commercial vehicles to suit your needs. From freight bodies and refrigerated vehicles to a removal truck or something completely unique, we offer a truly bespoke conversion service. We are a founder member of the Vehicle Builders Type Approval and have gained a solid reputation for ingenuity and exceptional design engineering.

Designed for efficiency

Aerodynamic front on the Skeletal Chassis removes conversion helps to enhance airflow around the vehicle for greater efficiency.

Removals conversion

Built on a Skeletal Chassis, the Ford 3.5 tonne 1-container removals vehicle offers a huge loadspace, complete with tie rails and ramp.

Refrigerated conversion

Ford 3.5 tonne Chassis Cab refrigerated conversion comes with gel coat flooring for easy cleaning, polar curtains and moving bulkhead.

Crew Van conversions

CoTrim van conversions. Where safety and quality come first.

CoTrim offers a wide range of aftermarket Crew Van and Double Cabin conversions for construction, schools, healthcare and emergency services. Our FlexiLiner, DuoLiner and DuoVan Crew Vans provide operators with an adaptable and safe solution for transporting a variable combination of people, cargo and equipment. A comprehensive choice of seating, bulkhead and loadspace options ensure maximum flexibility and comfort.

Custom DuoVan 5/6 seat Crew Van

Three seat bench with ISOfix to outer seats and integral ABS bulkhead for crew protection.

Transit DuoLiner 4/6 seat Crew Van

Provides safe and comfortable transport for up to six people. Second row seats have quick-release floor fixings for easy removal.

Transit FlexiLiner 7/9 seat Crew Van

Shown with two rows of three individual 'Comfortline' removable seats, mounted on a floor rail system.

Website

Campervan conversions

The UK's leading manufacturer of compact motorhomes.

Wellhouse Leisure has been converting the Ford Transit Custom since 2013 and has now built over 700 campers based on the Tourneo, Kombi Trend and Limited Van. The Trento, Tellaro & Misano versions are available in SWB or LWB and with either elevating or high top roofs. Equipped with Italian designed furniture, German sliding seat system, optional extra seats, solar panel, blown air heating. The Wellhouse camper has full European Type Approval, National Caravan Council Approval and is one of only two European campervan manufacturers with QVM accreditation.

Elevating roof or high top

The Wellhouse campervan is available with either an elevating roof or a high top.

Sliding rear seat

The German sliding seat system is fully European crash tested with multipoint fixings and optional extra seats.

Front swivel seats

Driver and passenger swivel seats are standard with a Ford fly-off handbrake.

Ford Tellaro MS-RT

The sportiest campervan that Wellhouse offers is based on the Tellaro with a motorsport-inspired twist for the ultimate in campsite chic.

Website

Customisation

MS-RT Road Technology.

MS-RT vehicles are created in collaboration with motorsport legend Malcolm Wilson. We fuse tough and reliable Ford vehicles with a sporting edge. Each created by hand. We bring together some of the most experienced designers, advanced production techniques and skilled craftsmen in our South Wales production facility. We assemble all of our bespoke vehicles especially for you; upgrading interiors and remodelling external features which creates the ultimate commercial vehicle.

One van, numerous options

Available as a 2 or 3 seat van, 5 or 6 seat Double Cab-in Van and a 8 or 9 seat Tourneo. Plus a choice of wheelbase lengths, tailgate or twin rear doors.

Makes light work of heavy loads

The exclusive 18" anthracite OZ Racing alloys produced especially for this vehicle, with 103 XL Load rated Hankook Ventus S1 evo2 tyres improve handling and responsiveness, whilst maintaining payload capacity.

Stand out on the road

State-of-the-art conversion includes a new front bumper and grille with integrated fog lights, front diffuser, body extensions, sills, rear diffuser, rear spoiler and twin sports exhaust all manufactured in the UK.

Blue Light conversions

Safeguard SVP. Designed to protect.

Safeguard SVP was established exclusively to meet the sophisticated and complex requirements of Blue Light fleets and the Emergency Services. The ISO 9001 recognised 'One-Stop Shop' facility, managed by experienced and dedicated staff, delivers a complete package service, from initial vehicle requirement right through to the supply of a fully prepared ready-for-use vehicle.

Ready to work

Camera technician van which has bespoke storage and racking for repair equipment for the mobile and static cameras.

Scene of crime unit

SOCO - Scene of crime unit which has specially designed storage unit for carrying equipment. All surfaces are wipe clean.

Custom cell unit

Cell van designed to meet all regulations required by the Police, this is used for carrying detainees to custody.

Speed enforcement vehicle

Racking conversions

Turning a van into a safe workspace.

A complete, integrated vehicle enhancement service designed to give you peace of mind every step of the way. From consultation to design, manufacture to installation, logistics to recycling – we handle it all. We also offer a full graphics and van livery service in-house. In addition, Bott are official FTA Van Excellence Gold Partners and won the acclaimed ‘Converter of the Year’ award in both 2017 and 2018.

Built to last

Bott offers three core ranges of van racking, designed to meet differing space, storage and budget requirements. Our racking is engineered to be durable, routinely crash-tested for safety and compliance, UK manufactured and installed to ISO9001 and ISO14001 standards.

Vehicle wrapping and signage

We've invested heavily in the latest digital printing and design technology and our experienced team can advise you on all aspects of van graphics design, including compliance with legislative requirements.

Fully-compliant conversions

Creating a safe workspace is paramount at Bott. Our in-house compliance team oversees this and Type Approval checks. Bott are also FTA Van Excellence Gold Partners.

Welfare conversions

With a welfare conversion from Bott, your remote workforce will have a self-contained, durable base from which to perform their duties. All areas of duty of care are covered, including toilet facilities, hand-washing, food heating, hot water, heating, power and health & safety. We offer 5, 6 and 8 seat crew transport solutions, designed with legal compliance in mind.

Specialist conversions

Custom-built solutions, from support units and rescue vehicles, to mountain rescue, animal transportation and air quality monitoring units. The Bott team will work with you to fully understand the vehicle's planned usage, then design, test and build a solution which is durable, safe and fit for purpose.

Racking conversions

Making work life easier.

Vanliners are one of a select group of approved Ford commercial vehicle converters. We offer a wide range of bespoke shelving solutions, tailored to customers' requirements. Our range of Modular, Lightweight plastic and plywood solutions are fully adaptable and available to suit any fleet size. Modular shelving offers a flexible and affordable method of securing tools, parts and equipment. Available in steel or lightweight aluminium, they can be used with workbenches, drawers, hazardous chemical cabinets and roller shutter doors. Together, they create the perfect working environment for any trade, no matter how large or small.

Flexible design

Vanliners can help accommodate specialised business requirements with ease.

Racking conversions

Expand your Ford Van with Sortimo. Made for professionals.

Sortimo van racking is the ideal solution, whatever your trade. From a simple shelf to a comprehensive interior racking package, our high-quality systems make it easy to organise your tools and equipment safely and efficiently. The use of rugged, yet lightweight materials maximises your van's available payload. While the innovative line-up of van equipment helps project a more professional image of your business. With the SR5, Sortimo has developed a van racking system that facilitates perfect workplace organisation in the smallest possible space for all trades and service providers. With the intelligent SR5 shelving system, Sortimo has opened up a new dimension to the procurement and utilisation of van racking.

The professional approach

When your van also serves as your mobile workshop, don't settle for anything less than Sortimo's van racking solutions.

Designed just for you

Whatever your business needs, Sortimo can help bring order to your van's interior with an extensive range of racking and storage options. This can be done via one of our expert designers or for a personal touch you can configure and order your own racking at www.mySortimo.co.uk very simply and quickly for maximum efficiency in the work day.

5S Method

Sortimo integrates the 5S method, firmly established in the industry, in the vehicle. The method, which comes from Japan, aims to optimise workplaces in terms of organisation and cleanliness, to facilitate maximum productivity. SR5 van racking provides all requirements for this: Special configuration options matched to workflows, maximum organisation by sub-division, labelling and tool inserts, together with complete systemisation using our cases and BOXes.

Refrigerated conversions

The Cold Consortium. Chilled vans built to last.

The Cold Consortium have been converting vans into refrigerated chillers, fridges and freezers since 1994. We have developed the best products available for the Light Commercial Vehicle temperature-controlled market, and are committed to developing our product range to keep up with the changing market requirements. All conversions are finished in environmentally-friendly epoxy resin and food-safe sealants, and we are the only manufacturer to use Ultra-Fresh Antimicrobial Protection as standard.

Transit Jumbo Fridge Van conversion

Every van is lined with insulated panels and finished with a wet-lay glassfibre bath-type finish. All laminated surfaces are bactericide treated for added safety.

Transit Freezer Van conversion

Shown with Loadloc bars and poles mounted between the sidewall rails to help secure loads whilst on the move.

Transit Custom Heat & Fridge Van conversion

Temperature controlled heat and chill van conversion (-10° C/+10° C) with under bonnet condenser.

[Website](#)

Refrigerated conversions

Award-winning fridge van conversions for temperature controlled transport.

CoolKit's award-winning fridge van conversions lead the way in the temperature controlled transport industry. Using 3D CAD software designs, state-of-the-art CNC machinery fabrication and superior quality control systems, every CoolKit conversion is designed and built to match your individual requirements. The converter makes use of light, strong and durable GRP sheet with woven roving reinforcement as our regular surface, avoiding the use of weighty timber elements in the wall construction, whilst not compromising on strength and durability. Load bearing floor panels benefit from additional reinforcements and a choice of finishes to suit your particular operation.

Assured performance

Original door fittings and releases are retained, ensuring their reliability after the insulation is fitted.

Bespoke conversions

Versatile fridge, freezer and chiller vans are designed and built to the customer's exact requirements to help ensure durable and effective operation.

Built to last

A neat, sealed perimeter on the door skins ensures that no water will penetrate the van loadspace.

Loadspace and payload capabilities

For larger and more robust requirements, Transit Panel Vans provide greater loadspace and payload capabilities.

Attention to detail

Our conversions deliver quality, durability and flexibility way above current industry standards, and represent fantastic value for money.

[Website](#)

Refrigerated conversions

Temperature-controlled panel van conversions.

GRP Leeds are at the forefront of specialist temperature-controlled Panel Van conversions. We deal with Ford Dealerships UK-wide and offer applications including, pharmaceutical, seafood, live animal carriers, fine artworks, etc. The QVM award status ensures strict standards in the production process, along with stringent stage checks and quality control. In addition, we follow Ford's Body and Equipment Mounting manual and offer a warranty for the conversion that matches, and indeed exceeds Ford's own warranty terms.

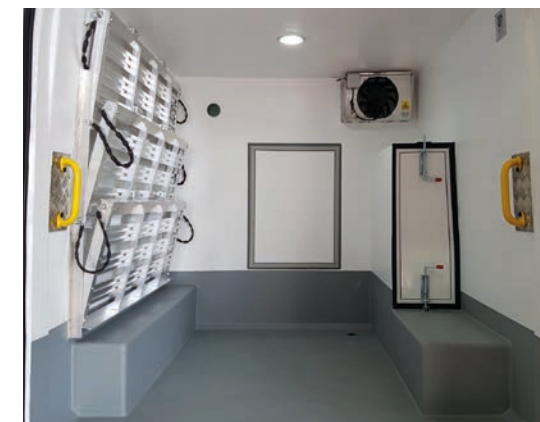

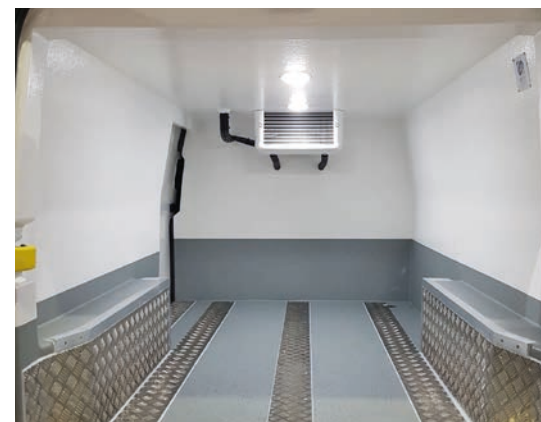

Transit Van

Conversions can be carried out on all wheelbase and roof height versions.

Transit Connect

Available to chill, freeze or heat, with or without single-phase electric standby.

Flexible conversions

Shelving, curtains, wheel box and pallet protection are available to suit individual requirements.

[Website](#)

Refrigerated conversions

Commercial, refrigerated and specialised vehicle bodybuilder.

Paneltex Somers offers a wide range of multi-temperature, frozen and refrigerated van conversions for Transit, Transit Custom and Transit Connect. Options include SuperFreeze fold-back side-load doors and a two-part, moveable and removeable Flexi-Temp bulkhead. When installed in conjunction with a suitable refrigeration unit, the system provides a dual-compartment Transit Van, with a temperature differential of 50°C between compartments, be it frozen, chilled, ambient or heated.

Side door options

Available options include a Superfreeze fold-back door or insulated sliding side door.

Certified conversions

Fully certified ATP approved conversions are available across the range.

High thermal efficiency

Like all Paneltex Somers conversions, the Transit Custom Fridge Van delivers class-leading thermal efficiency.

Built to perform

Vans can be insulated from a simple refrigerated specification, or to a frozen or deep-freeze specification.

Transit 3.5 tonne conversion

The 3.5 tonne range of box vans combine outstanding thermal efficiency with a high payload.

Welfare conversions

Designed with your workforce and application in mind.

The Ford Transit Welfare Vehicle from Cartwright Conversions is designed to take care of your workforce on the move. Built to carry up to seven people, this robust vehicle comes with standard messing facilities and a uniquely designed section in the rear that keeps the toilet and storage area separate. Fully Type Approved, the vehicle goes through a rigorous quality control process before it leaves our premises in Yorkshire.

Optimised interior space

Well thought-out conversion includes a seating area with table, plus space for tools, consumables and work wear.

Food preparation area

Onboard comforts include a microwave, water heater and convenient food preparation area.

Attention to detail

Standard safety features include a fire extinguisher, first aid kit and eye wash station.

Fully-equipped washroom

An electric flush toilet and a sink with automated tap optimise hygiene and minimise waste.

[Website](#)

Welfare conversions

Welfare van solutions made easy.

Our range of welfare van conversions is market leading and wide-ranging, with many of the leading hire companies and specifiers now choosing the 'Lyndon Systems' option. Our philosophy is to take the standard welfare design and improve in all areas, making the vehicle robust with fewer off-hire days, and assist field workers using the vehicle by making the facilities as comfortable as possible. Our after-care service on welfare conversions includes: a 24-hour assist line manned by our own trained personnel, who can help diagnose and fix most problems. If required, a member of our trained team will attend the vehicle on-site. A 36-month warranty (can be extended if required).

Crew accommodation

All welfare vehicles are fitted with N1-crash tested fixed seating and a table that can accommodate up to 5 people.

Comprehensive facilities

Mess facilities include a sink, tea boiler and microwave, while the rear of the vehicle incorporates a toilet area with hot and cold running water and heating.

Utility full body conversion (FBC)

A robust, reliable and recyclable alternative for customers with high standards and time critical requirements.

Strong's conversions offer a cost-effective alternative to a traditional fibreglass body and internal racking. With high impact resistance and lightweight design, our innovative copolymer bodies offer reduced maintenance costs and less down time, improving readiness for any major events. Developed to work in the harshest environments, Strong's body conversions offer an ergonomic platform that will never let you down.

Lighting and graphics

Integration of the original light clusters offer easy maintenance, and graphics can be applied to suit industry standards and customers' corporate image.

Internal layout

Internal layout can be tailored to suit each customer's specific requirements meaning that your tools are always in the right place.

Life expectancy

Copolymer bodies offer excellent value for money, often outlasting the base vehicle and being used on a second chassis.

Storage and ergonomics

Increased storage and lower side doors offer better storage and improved manual handling properties over traditional canopies.

Wheelchair accessible

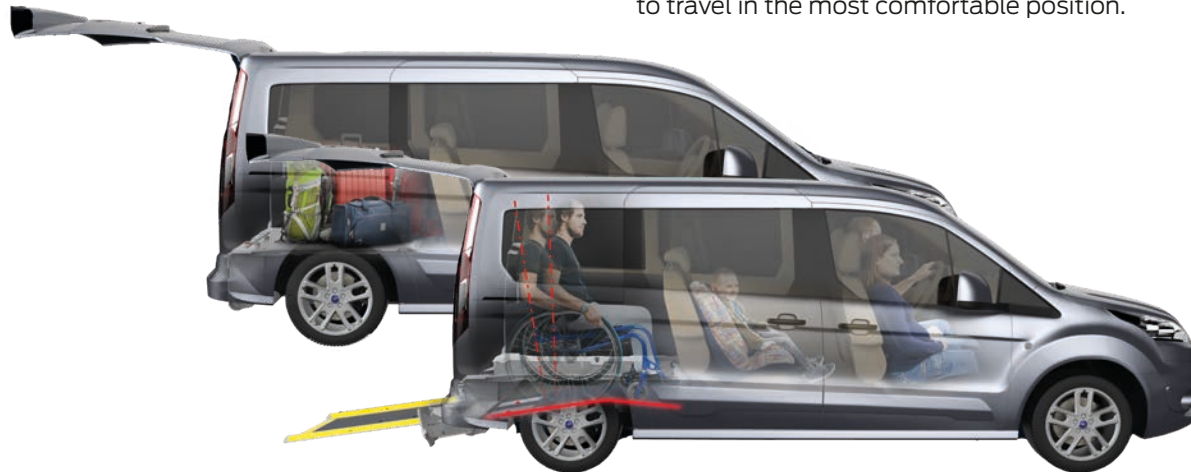

Conversions without limits.

With over 40 years of experience in the mobility market, Alfred Bekker API produces some of the highest quality wheelchair accessible vehicles in the industry, but at an affordable price. Highly popular both with families and taxi operators, the unique FlexiRamp™ design offers the lightest fold-flat ramp on the market, making it easy for end users. The fold-flat ramp system allows for full use of the boot space when a wheelchair passenger is not present. The FlexiCurve floor allows a wheelchair user to find the most comfortable position in which to travel.

FlexiCurve floor

The FlexiCurve floor allows the wheelchair user to travel in the most comfortable position.

Unique FlexiRamp™ conversion

The Ford Grand Tourneo Connect FlexiRamp™ conversion can be built as a 7-seater WAV option, ideal for taxis or larger families. The lightweight ramp provides a shallow gradient, allowing easy access for the wheelchair passenger.

Wheelchair accessible

The UK's leading manufacturer of adapted vehicles.

Allied Mobility is a leading wheelchair accessible vehicles specialist for the UK and Ireland. With its unique EasyGlideTM access ramp, the Tourneo Connect-based FreedomTM offers superb usability for wheelchair users. For larger families or small groups, the spacious Tourneo Custom-based IndependenceTM is both easy and enjoyable to drive.

Unique EasyGlideTM ramp

Tourneo Connect-based FreedomTM offers superb access for wheelchair users.

EasyFoldTM access ramp

Ford IndependenceTM features a low gradient EasyFoldTM access ramp.

Ford IndependenceTM

Tourneo Custom-based IndependenceTM is ideal for larger families or small groups.

Wheelchair accessible

CoTrim van conversions. Where safety and quality come first.

CoTrim provides a comprehensive range of aftermarket wheelchair accessible conversions. Based on Ford Transit and Tourneo Custom models, our AccessLine range of wheelchair accessible vehicles provides flexible accommodation for a combination of seated passengers and wheelchair users. A wide range of options is available and all models can be tailored to meet customers' individual requirements.

Transit 350 Accessline

M1 9-seat WAV, with capacity for up to three wheelchair passengers.

Wheelchair lift

Transit 410 Accessline's underfloor wheelchair lift provides easy access to the rear of the vehicle.

Transit 460 Accessline

Flexible accommodation for up to 16 passengers, plus the driver, or a combination of wheelchairs and carers.

Tourneo Custom Accessline

Cost-effective accessible transport for up to three wheelchair passengers (shown with ramp deployed).

Wheelchair accessible

The UK's premier accessible vehicle converter.

GM Coachwork are the premier specialists in wheelchair accessible vehicles in the UK. With 30 years' experience our adapted vehicles are the first choice for wheelchair users, up and down the country. As an award-winning converter and ISO accredited business, you know you're in good hands.

Ford Grand Connect Flame+

The family-sized Flame+ provides seating for 5, plus a wheelchair passenger. With its lowered floor and bi-fold ramp, the Flame+ offers easy access and plenty of headroom.

Ford Tourneo Custom Chorus

For larger families the Ford Tourneo Custom Chorus offers seating for 7, plus the wheelchair passenger.

Ford Tourneo Custom Quantum

The Ford Tourneo Custom Quantum features seating for 7. The wheelchair occupant sits alongside the rear passengers for an inclusive passenger experience.

Wheelchair accessible

A leading converter and provider of Wheelchair Accessible Vehicles throughout the UK and Ireland.

With almost 70 years of experience working with disabled drivers and passengers, McElmeel Mobility Services were the first vehicle converter in Europe to be accredited as a Ford Qualified Vehicle Modifier. Renowned for 5-star customer service and innovative customer-centred design, McElmeel offers a vast range of Wheelchair Accessible Cars, Taxis and Minibuses, with conversions available to suit virtually all requirements. Stylish vehicles with a beautifully finished interior, you'll be glad you chose Ford and McElmeel.

Taxi conversion

Councils across the UK have welcomed McElmeel's European Type Approved Taxi conversion onto their list of approved vehicles. This excellent wheelchair accessible conversion has been crash-tested and can be fitted to new and pre-owned Ford Customs.

Ford Tourneo Custom

Wheelchair Accessible Vehicles designed with you in mind. Options available in both SWB and LWB Customs, such as lowered floor with class-leading internal headroom, and a tow bar-compatible conversion to vehicles that accommodate up to 9 people.

Inclusive seating positions

Understandably, customers want a vehicle that will allow the wheelchair user to travel beside and amongst their friends and family. Better driver/passenger visibility and a more comfortable journey. This example shows the interior of the Ford Tourneo Custom Family.

Wheelchair accessible

Stanford Coachworks, high-quality bespoke vehicle conversions.

Stanford Coachworks provides a variety of aftermarket conversions for the Ford range, individually tailored to our customers' specification, including wheelchair accessible minibuses. Conversions range from single wheelchair passenger vehicles to combination passenger and wheelchair passenger vehicles, school buses, PTS, executive minicoaches and splitter and tour buses. Our innovative designs support our customers and enable them to transport their passengers in comfort.

Ease of access

Ford Transit Custom is available with rear access ramp or wheelchair lift. All heights, lengths and transmissions are available.

Ford Tourneo Connect conversion

Shown with accessible ramp for a single wheelchair passenger.

Ford Transit conversions

Available with internal and underfloor tail lift options. Transit conversions can be designed to accommodate up to 16 passengers or a combination of wheelchair passengers and seated passengers.

Features to make your life easier

SYNC 3

New Ford SYNC 3 integrates seamlessly with your compatible smartphone, letting you control everything from phone calls and text messaging, to music and satellite navigation – all via the embedded touchscreen, or by using remarkably simple voice commands. (Availability varies according to model. Please see your Ford Dealer for details)

Ford Easy Fuel capless refuelling system

Ford Easy Fuel capless refuelling system ensures that nobody can accidentally fill up with the wrong fuel. Plus, no dirty fuel caps to touch. (Standard)

MyFord Dock

Designed to hold your smartphone, MP3 player or navigation device. Stream your music through your vehicle's speakers via Bluetooth® or by using a USB cable connected to the Connection Radio. Lidded compartment provides storage for your device and contains a charge-only USB socket. (Availability varies according to model. Please see your Ford Dealer for details)

Tyre Pressure Monitoring System (TPMS)

As an important safety feature, the Tyre Pressure Monitoring System (TPMS) will illuminate a warning light if one or more of your road tyres are significantly under-inflated. (Availability varies according to model. Please see your Ford Dealer for details)

Special Vehicle Options

Ford programmable battery guard

This patented battery guard system ensures you'll never be stranded with a flat battery. Set a time for battery use without the engine running, create profiles for battery use (heavy or light use, with and without additional batteries) and protect your battery from starter motor overload. This highly functional unit is packed with features. (Option)

High electrical power system

Specially developed for Transit Conversions with heavy power needs, such as emergency vehicles, refrigeration units and maintenance vehicles. (Option)

System contains:

- High performance AGM batteries
- Engine RPM control

Twin high performance AGM batteries

Available for higher electrical loads, providing improved reliability when deep-cycling. (Option)

Special paints

Your company's livery is an important business asset, so Transit is available in a huge range of colour options.

More details on Special Vehicle Options are provided in the Body and Equipment Mounting Manuals on the Ford Etis website www.etis.ford.com

Illustrations, descriptions and specifications. This catalogue was correct at the time of going to print. However, Ford policy is one of continuous product development. The right is reserved to change specifications, colours and recommended prices of the models and items illustrated and described in this publication at any time. For the latest details always consult your Ford Dealer. **Optional equipment.** Throughout this publication, wherever a feature is described as being an 'Option' or 'Option Fitment/Pack' etc, you should assume that it will be at extra cost to the base vehicle, unless specifically stated to the contrary. All models and colour combinations are subject to availability. **Note.** Some images portrayed are of a pre-production model and/or are computer generated, therefore, the design/features on the final version of the vehicle may differ in various respects. In addition, some of the features shown on the vehicles may be optional. **Note.** The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Ford Motor Company is under licence. Other trademarks and trade names are those of their respective owners. **Note.** Some driver assistance features and safety features described in this brochure are designed to function using sensors, whose performance may be affected under certain weather or environmental conditions.
